Phylogenetics is the scientific discipline concerned with describing and reconstructing the patterns of genetic relationships among species and among higher taxa.

29+ Evidences for Macroevolution: Phylogenetics

The INTRODUCTION TO STATISTICS is the first module of the Primer in Statistics. After completing this module you will be able to use statistics to specify the accuracy and variation of a process.

Population genetics is a subfield of genetics that deals with genetic differences within and between populations, and is a part of evolutionary biology. Studies in this branch of biology examine such phenomena as adaptation, speciation, and population structure. Population genetics was a vital ingredient in the emergence of the modern evolutionary synthesis.

Variations and sub-classes. Statistical hypothesis testing is a key technique of both frequentist inference and Bayesian inference, although the two types of inference have notable differences. Statistical hypothesis tests define a procedure that controls (fixes) the probability of incorrectly deciding that a default position (null hypothesis) is incorrect.

A Web site designed to increase the extent to which statistical thinking is embedded in management thinking

for decision making under uncertainties. The main thrust of the site is to explain various topics in statistical analysis such as the linear model, hypothesis testing, and central limit theorem

Dr. Arsham's Statistics Site - home.ubalt.edu

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.
