The original edition of Antenna Compendium Volume 4 included a 3.5-inch diskette with data files and software applications. Many of the articles contained within this book make reference to these files and programs. The software diskette is not included in this printing of Antenna Compendium Volume 4 because most of the programs will no longer function on modern computers.

A light-emitting diode (LED) is a semiconductor light source that emits light when current flows through it. Electrons in the semiconductor recombine with electron holes, releasing energy in the form of photons. This effect is called electroluminescence. The color of the light (corresponding to the energy of the photons) is determined by the energy required for electrons to cross the band gap ...
