bird mimicry a remarkable pdf

A lyrebird is either of two species of ground-dwelling Australian birds that compose the genus Menura, and the family Menuridae.They are most notable for their superb ability to mimic natural and artificial sounds from their environment, and the striking beauty of the male bird's huge tail when it is fanned out in courtship display. Lyrebirds have unique plumes of neutral-coloured tailfeathers ...

In evolutionary biology, mimicry is an evolved resemblance between an organism and another object, often an organism of another species.Mimicry may evolve between different species, or between individuals of the same species. Often, mimicry functions to protect a species from predators, making it an antipredator adaptation. Mimicry evolves if a receiver (such as a predator) perceives the ...
