The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 14–16 billion neurons, and the estimated number of neurons in ...

Concept. Cryonic proponents go further than the mainstream consensus in asserting that the brain does not have to be continuously active to survive or retain memory. Cryonics controversially asserts that a human survives even within an inactive brain that has been badly damaged, provided that original encoding of memory and personality can, in theory, be adequately inferred and reconstituted ...

Every so often, someone on Reddit realizes that about half of people wipe themselves with toilet paper sitting down, and the other half do it standing up. This discovery is followed by horror on both sides that other people do it differently. I occasionally have the same feeling when I talk about ...

1. Ontological Naturalism 1.1 Making a Causal Difference. A central thought in ontological naturalism is that all spatiotemporal entities must be identical to or metaphysically constituted by physical [] entities. Many ontological naturalists thus adopt a physicalist attitude to mental, biological and other such "special" subject matters.
